History of the Earth 10SCIE - Geology

Finn LeSueur

2019

Learning Outcomes

•	Get an	overviev	v for the	e history	of the H	Earth	
		_					

Starter

- 1. Draw a vertical line in the center of your page and label it from top to bottom with: 5 billion years ago, 4 billion, 3 billion, 2 billion, 1 billion and now.
- 2. Label one side **Scientists Estimation** and the other **My Estimation**.

Guess the dates of the following on your line:

- When the Earth was first formed
 - When life first began
 - When plants first appeared
 - When dinosaurs first appeared
 - When dinosaurs became extinct
 - When early humans first appeared
 - When humans started to record things
 - $\bullet\,$ When the Earth was first formed: 4.5 billion years ago
 - When life first began: 3.5 billion years ago
 - When plants first appeared: 470 million years ago
 - When dinosaurs first appeared: 230 million years ago
 - When dinosaurs became extinct: 65 million years ago
 - When early humans first appeared: 200,000 years ago

• When humans	started to record things: 5,000 years ago
Practical: Toil	et Paper Timeline

Research / Homework

- Find out how scientists have aged the Earth.
- $\bullet\,$ What evidence have they used for their estimation.
- Bring your research to class tomorrow!
